Hands-On Demo Building an App

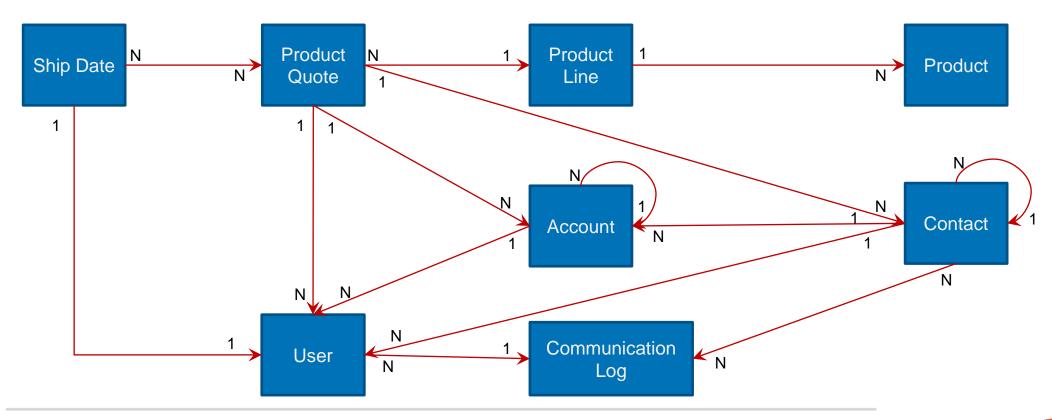

Hands-On Demo Building an App

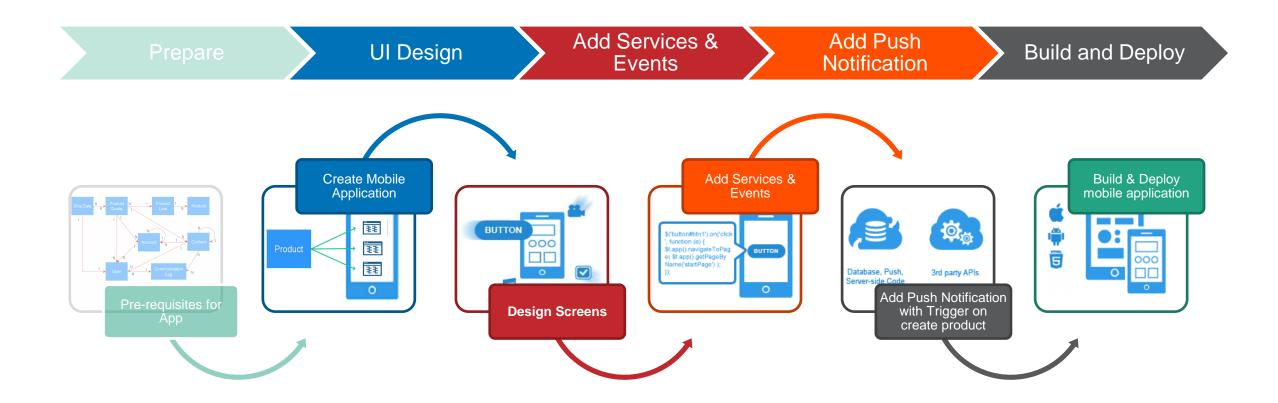

Prepare: Build Pre-requisites for App

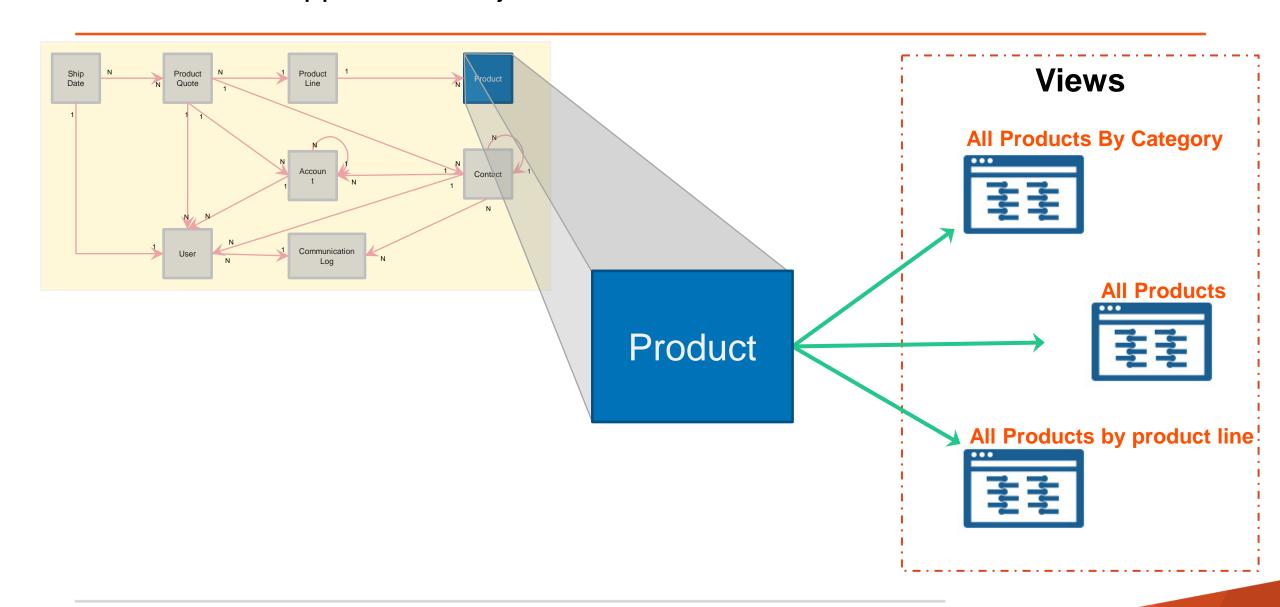

Rollbase application "Order Management" installed from Rollbase application directory.

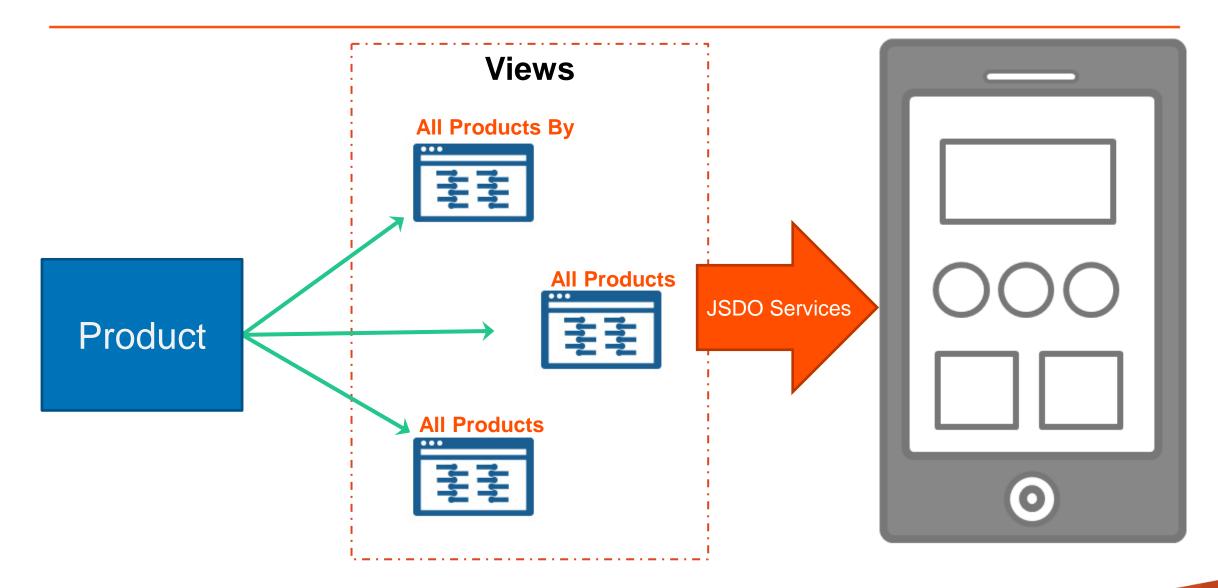

Create Mobile App

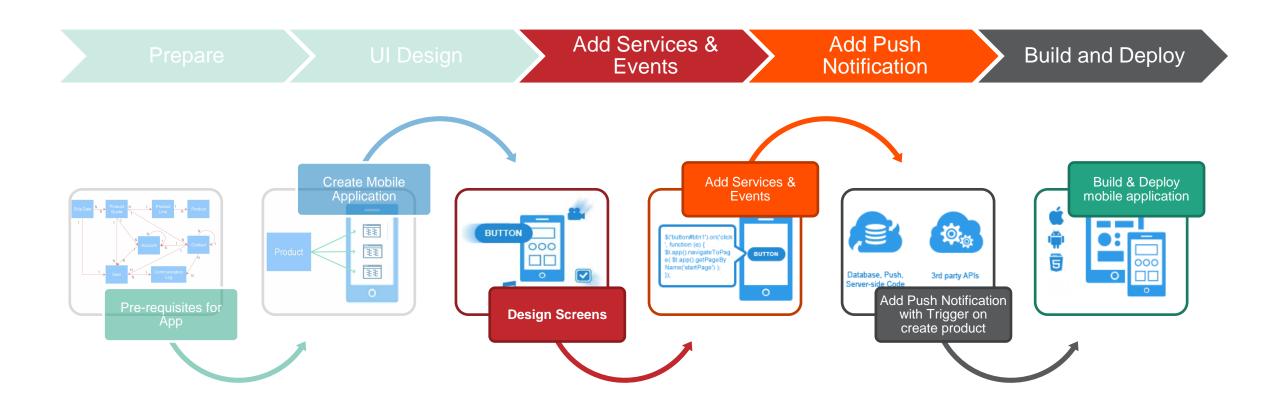

Create Mobile App: Select Objects & Views

Create Mobile App: Select Objects & Views

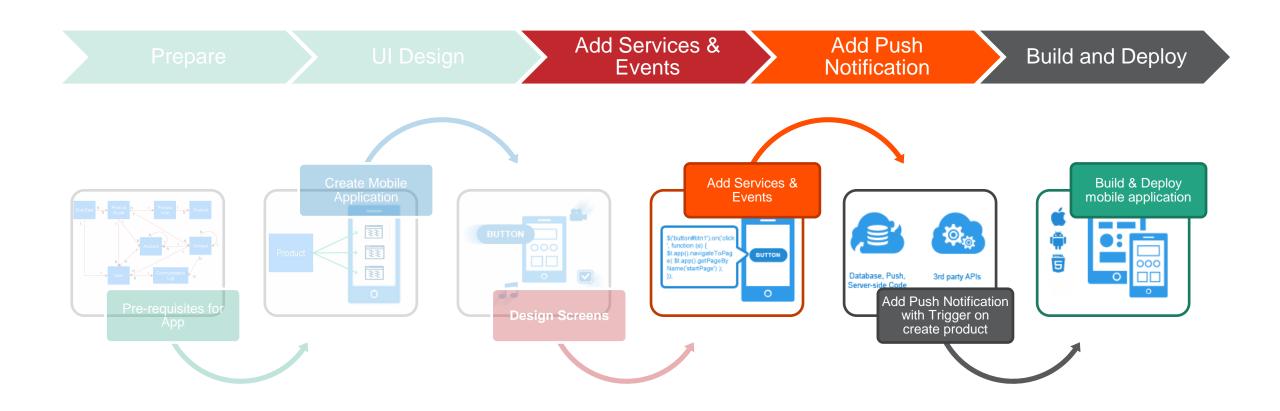

Design Screens

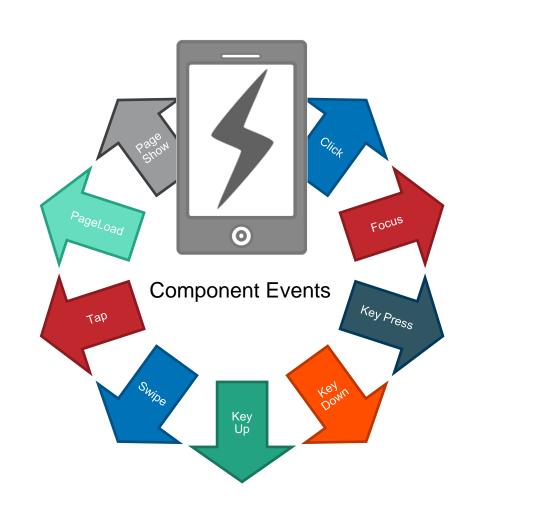

Design Screens: CRUD Screens

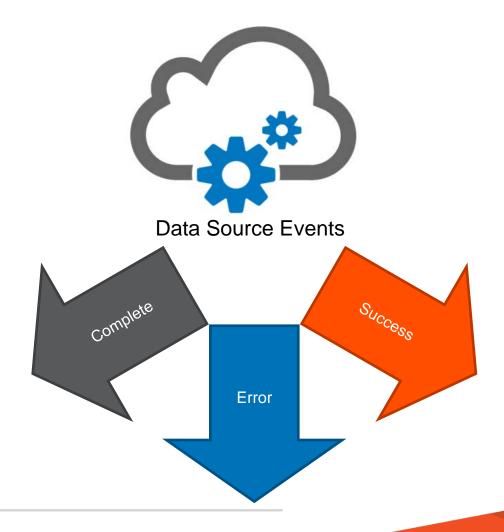

Add Services & Events

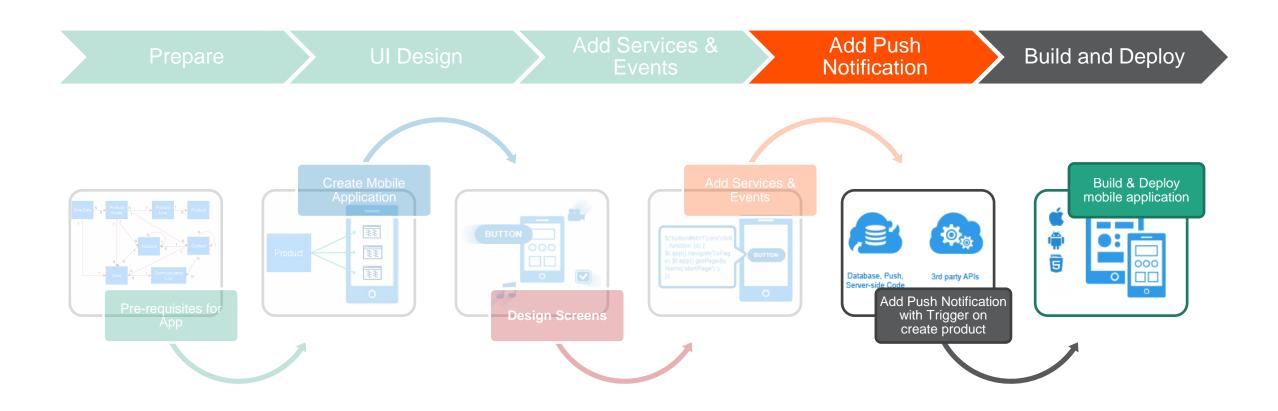

Add Services & Events

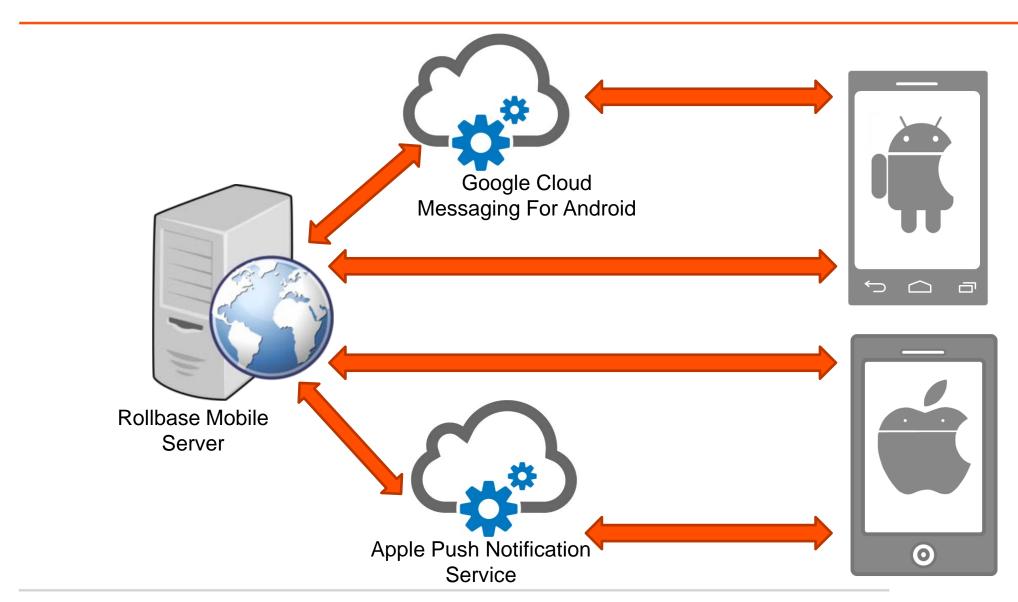

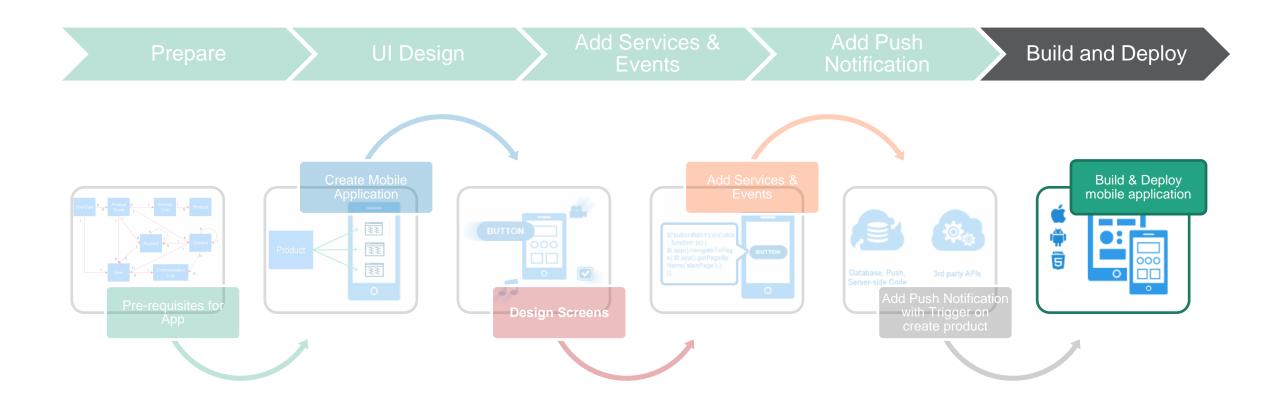

Add Push Notification with Rollbase Triggers

Push Notifications

Build & Deploy Mobile Application

Build & Deploy

Rollbase Mobile App Builder

Rollbase Mobile Build Server

Benefits

Easily assemble, deploy and manage mobile applications – including the entire application infrastructure

Leverage on-premise and cloud-based data sources as the foundation for your mobile apps

Build powerful, visually compelling apps using a visual developer and standard technologies like HTML5 and JavaScript

 Support HTML5 applications or native applications using a hybrid architecture that eliminates costly device-specific coding

Provide an intuitive, native mobile experience using a hybrid architecture that eliminates costly, device-specific coding
